

Living Shorelines

for Coastal Erosion Protection in a Changing World

A One-Day Workshop

Living Shoreline: “A shoreline management measure that provides erosion control benefits, protects, restores or enhances natural shoreline habitat and maintains coastal processes through strategic placement of plants, stone, sand fill and other structural organic materials.”

... Construction of a Living Shorelines project

(Photos: S. Hardaway)

- Hear from national experts how to evaluate, plan, design, construct and monitor living shorelines for coastal erosion control projects
- Learn what will and will not work in New York and why
